

ENVIRONMENT AND ENERGY CONFERENCE

JUNE 19 - 20 | 2007

Metro Toronto Convention Centre

Anchored by the US Border States and the province of Ontario, the Great Lakes Region is the economic epicenter of Canada–US Trade and Industry.

Business and government leaders in the Region are increasingly focused on enhancing the productivity and competitiveness of companies and major business sectors. And rightly so.

EECO, Environment & Energy Conference, is the premier bi-national Business and Environment Forum that shines a spotlight on critical market risks and opportunities. **EECO** is focused on three issues which require new solutions and innovative approaches if the Great Lakes Region is to maintain a sustainable development path: Clean Energy, Climate Change, Clean Air.

Through a highly dynamic and influential Conference and Exposition, **EECO** presents Tier One speakers, interactive sessions and up-to-the-minute market intelligence at the nexus, or the 'Sweet Spot', of Business Competitiveness, Environmental Protection and Technology Innovation in these three areas.

EECO 2007 CONFERENCE PROGRAM THEMES

EECO 2007 will focus on three main issues of importance to the Great Lakes Region:

- Clean Energy
- Climate Change
- Clean Air

EECO has a demonstrated track record of delivering outstanding value to delegates, sponsors and partners by connecting them to a Forum which has become known for its on-the-mark content, networking events and flair, including the GLOBE Awards for Environmental Excellence.

EECO 2007 will feature new value-added elements:

- More interactive sessions with corporate CEOs and executives
- Cross-cutting theme of business solutions and sustainable innovation
- Targeted programming for key sectors, including: energy, resources, transport, manufacturing, buildings, municipalities and economic development
- A profile on the Talent Pipeline, including a special YEP program
- Hands-on looks at how sustainable innovation and technologies are critical elements to enhanced productivity and competitiveness
